expasyl exact

Clinical case

Dr Ingo BARESEL

Dr Ingo BARESEL has been practicing dentistry since 1996 in Germany.
He is specialized in periodontics and orthodontics.
This is a clinical case he fulfilled while using Expasyl™ Exact

Dr. Ingo BARESEL

Expasyl™ Exact always has the best properties in terms of stopping bleeding, drying and elimination of the sulcus

- Advantage of the single dose capsule: more cost-effective, saves time and provides a longer shelf life for the product
- Ability to absorb sulcular fluid and allows a good drying
- The viscosity of the paste is well adjusted, it is sufficiently firm to open the sulcus
- Dried sulcus = a great starting point for optical impression

Dr Ingo BARESEL
Clinical case

expasyl exact

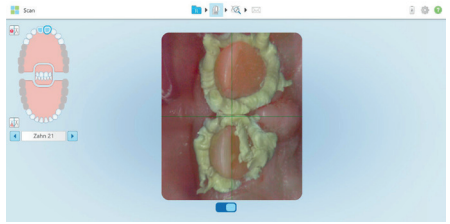
Expasyl™ Exact application

Putting in place Expasyl™ Exact on teeth number 11 and 21 to have a clear sulcular opening.

"Insertion of the paste into the sulcus as vertical as possible, with an insertion speed of 2mm/second"

Expasyl™ Exact applied

Expasyl™ Exact in place on teeth 11 and 21. Placement of the product for 2 minutes to obtain a clean and precise sulcular opening for the rest of the procedure.
Digital impression taken during Expasyl™ Exact's placement.



Sulcular opening

After 2 minutes, Expasyl™ Exact was rinsed off easily with a air/ water syringe, leaving a distinct sulcular opening.
We can distinguish the "white" part of the gingiva, which represents the dried sulcus.

CAD/CAM impression

"Almost 10 years ago, we completely digitalized the impression process in our dental practice."
Dr. Ingo Baresel is an expert in taking digital impressions and produces a high quality impression with Expasyl™ Exact.
